

## Measures we are taking in response to Covid-19:

### **Expanded sanitizing procedures**

include wiping down all touched surfaces once an hour

### **Staggered Schedule**

We want to limit traffic in the waiting area. We are allowing up to 3 people in the waiting room at one time. If you would like you are welcome to wait outside on the patio and wait for your therapist to come get you for your session.

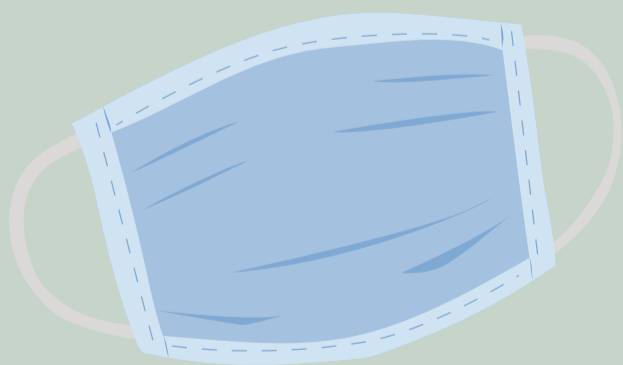

### **Lengthened breaks between clients**

By giving the therapists longer breaks in between their appointments, there will be less traffic in the waiting room as well as giving the therapists enough time in between to properly sanitize frequently touched surfaces, as well as sanitize themselves for the next client.

### **Health Screening**

Introduced daily screening questions for clients and for staff to ensure no one coming into our facility has experienced symptoms or been around someone who has experienced symptoms.

### **Face Masks**

Ensure that both clients and staff wear masks at all times.
